

## Visit Staron® Surfaces at "The Big Show" in Orlando.

With new colors, and a new product line, Staron® Surfaces will be making a splash at the 2007 International Builders' Show in Orlando, Florida, Feb. 7-10. This year's show takes place at the Orange County Convention Center.

With its theme "The Big Show," IBS is capitalizing on its status as the world's largest annual light construction show with more than 100,000 professional attendees.

Those who visit the Staron® Surfaces booth (W191) can see the wide range of surfacing options offered by Staron, collect samples and learn about programs and incentives available to trade professionals. **The biggest news for the 2007 show, however, is the launch of Tempest, a new surfacing category by Staron.**

Tempest is a solid surface alternative, specifically designed with a look that rivals natural stone and

quartz. Yet it offers all the features and benefits that customers demand of solid surface, such as its seamless appearance and its nonporous, hygienic properties. Tempest also allows the creation of seamless backsplashes, integration with Staron® sinks and bowls, and nearly endless edge possibilities. The 10 new colors from the Tempest launch will be on display.

Also on display at the Staron® booth are these product categories:

### **Staron® Quartz**

This remarkable blend of technology and nature results in a surface that is composed of mined, quartz crystals, one of the hardest minerals found in nature. Available in 14 natural colors, Staron® Quartz is scratch- and heat-resistant, nonporous and, unlike granite, requires no sealing.

### **Staron® Solid Surfaces**

Available in more than 60 colors, Staron® Solid Surfaces is categorized in seven groups characterized by different particulate sizes. With its many residential and commercial uses, its design versatility, and its nonporous, seamless composition, Staron® Solid Surfaces offer an option for any project.

### **Staron® Sinks and Bowls**

Available in three versatile colors and nine popular styles, Staron® Sinks and Bowls allow designers and builders to create a smooth, integrated, one-piece sink and countertop that's hygienic and easy to maintain.
