

Staron® Showcases New Color Palates at IBS Booth #w201: Unique surfaces for residential and commercial applications

LOS ANGELES (February 2008) – Staron® Surfaces, a division of worldwide technology leader Samsung, will have a significant array of surfaces to share with visitors at the 2008 International Builders' Show (IBS) in Orlando. Among the brand's highlights is the recently expanded Tempest line, which added 10 new colors, bringing the entire Tempest palette to 20 color options.

In addition to the new Tempest colors, Staron is sharing its exciting news of earning GREENGUARD certification on its full range of Solid Surface materials, including the Staron Tempest line and Staron all-acrylic sinks/bowls. Each of the product lines passed the requirements of two GREENGUARD certification programs:

- **GREENGUARD Indoor Air Quality Certified®** product certification, which is granted for low-emitting interior building materials, furnishings and finish systems.
- **GREENGUARD for Children & Schools SM certification**, a more stringent certification and is granted for low-emitting interior building materials, furnishings and finish systems used in educational (day care and K-12) environments.

All Staron product lines are available for viewing at IBS, **Booth #W201**. Executives will be on hand to discuss the uniqueness of the brand, its hygienic benefits, its variety and how Staron fits the needs of residential and commercial builders and designers.

About Staron® Surfaces by Samsung

Staron offers three great surfacing options – high-performance Staron Solid Surfaces, luxurious Staron Quartz and the versatile Staron Tempest. All combine natural beauty with design sensibility to offer a variety of colors and patterns. Durable, stain-resistant and hygienic, Staron Surfaces makes the design and selection process easy.
