Staron® Expands North America Distribution Network

LOS ANGELES – Staron® Surfaces, a division of worldwide technology leader Samsung, has expanded its market reach throughout North America by adding six new distributors to its team. Those joining the Staron Solid Surface and Radianz™ Quartz family are:

- Wanderosa – Toronto, Ontario, Canada (Radianz Quartz)
- Holdahl Co. – Plymouth, MN (Radianz Quartz)
- Youngblood Lumber Co. – Minneapolis, MN (Staron Solid Surface)
- Stone Connection Inc. – Norcross, GA (Radianz Quartz)
- Stone Source – Dallas, TX (Radianz Quartz)
- National Wood Products Inc. – Sacramento, CA (Staron Solid Surface and Radianz Quartz)

“We’re excited to add these quality partnerships to our network,” said Dale Mandell, Staron’s North America Sales Director. “These distributors give us even more geographic coverage throughout North America, resulting in easier access to our expanded product line. With them, we’re positioned to better meet the needs of trade partners that are seeking hard-surface solutions for residential and commercial interiors.”

The six new distributors will be carrying Radianz Quartz and/or Staron Solid Surface. Both product lines offer an extensive array of benefits, including their impressive range of color choices. Both Radianz and Staron Solid Surface lines have been recognized as healthy countertop choices. They are GREENGUARD certified by the GREENGUARD Environmental Institute and help in the overall effort to support more healthful interior air quality in homes and public spaces.

About Staron® Surfaces by Samsung

Staron offers three great surfacing options – high-performance Staron Solid Surfaces, luxurious Radianz Quartz and the versatile Staron Tempest. All combine natural beauty with design sensibility to offer a variety of colors and patterns. Durable, stain-resistant and hygienic, Staron Surfaces makes the design and selection process easy. For more information about Staron and application ideas, please visit www.staron.com or call 800.795.7177.
